Epoxy:
Why and how
it works

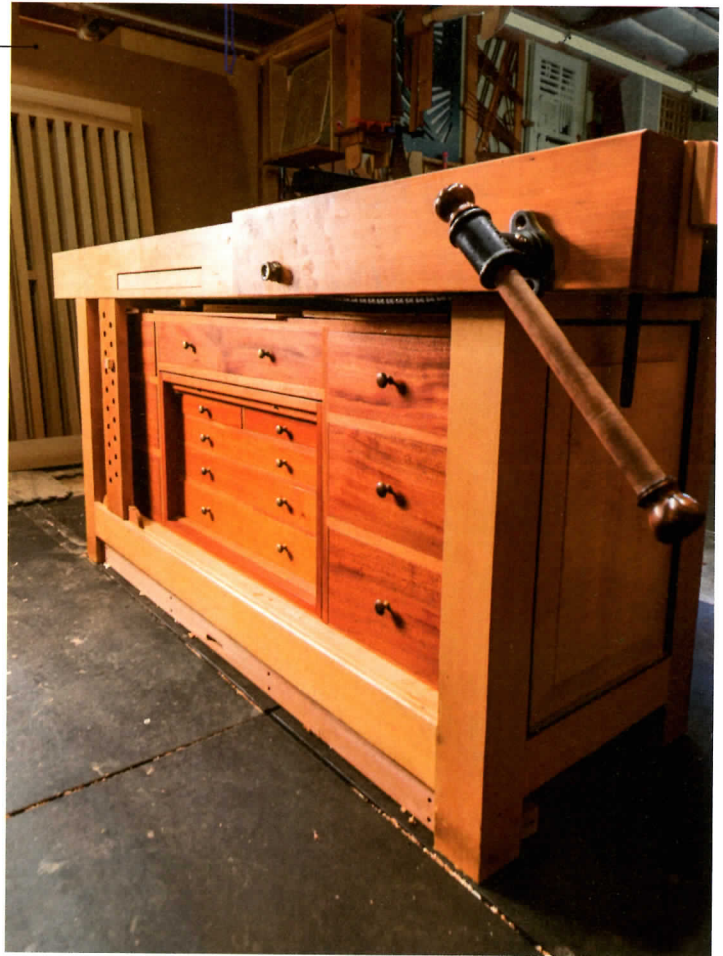

BEN PROWELL

@prowell_ben, Sebastopol, Calif.

This tool cabinet, enclosed in Prowell's workbench, has as its core his North Bennet Street School toolbox, surrounded by drawers for extra storage.

"I wanted a big, open workbench with no fuss," Prowell said. "I wanted something to commemorate my time at NBSS, and what better way than to house the toolbox front and center?"

WESTERN RED CEDAR, MAPLE, AND MAHOGANY, 27D X 57L X 37H

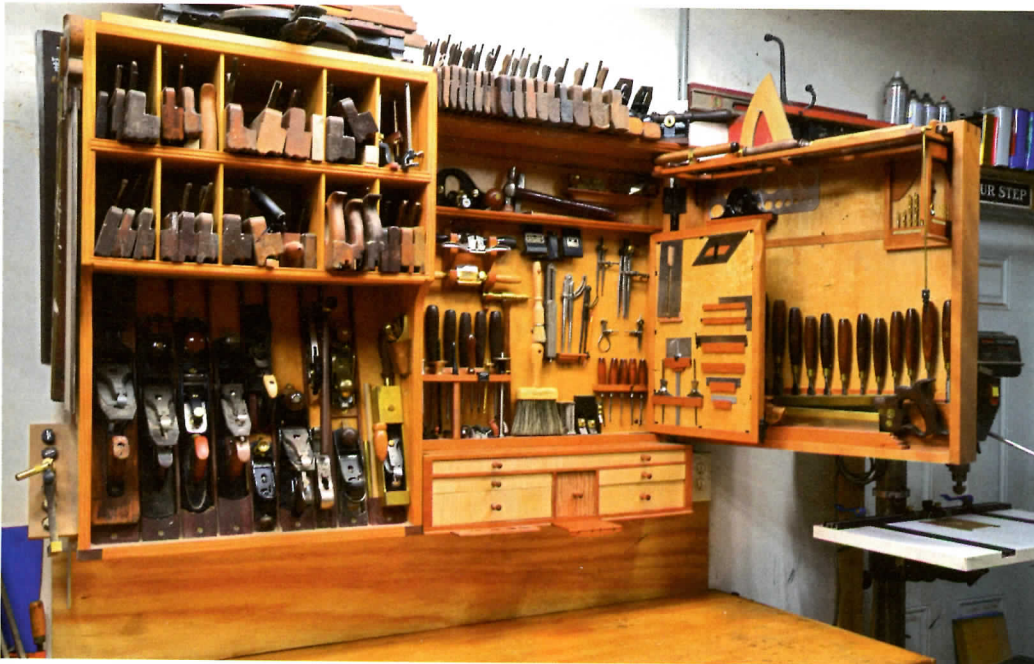

FELIX KRUEWIG

@shiwasefurniture, Aachen, Germany

Krudewig designed this Japanese-style toolbox as part of an apprenticeship program. "I am very fascinated with Japanese woodworking and I love their interior designs," he said. The toolbox has a drawer and two boxes inside, and the lid incorporates a special lock system.

OAK, PURPLEHEART, AND WALNUT, 14D X 24W X 15 $\frac{3}{4}$ H

MARTIN JONES

@mgj1954, Cooper City, Fla.

This cabinet was inspired by the H.O. Studley cabinet published in *FWW* years ago. "I have loved that cabinet since I first saw it," said Jones, a fourth-generation woodworker whose father introduced him to the craft. His goal was to create a showcase for his tools. "Several of the tools are cherished family heirlooms, a couple are antiques, a few I made, some I have had for decades, and some are new," he said.

CHERRY, CEDAR, AND SPALTED MAPLE, 7 $\frac{3}{8}$ D X 26 $\frac{3}{8}$ W X 33 $\frac{1}{2}$ H
